In today's competitive world, Companies expect the improvements for growth with SMART (Specific, Measurable, Achievable, Realistic, Timed) objectives. Many KPIs have been developed among which, Equipment measurement is one of the important factors to decide the overall plant performance. For the above measurement, a quantifiable indicator is Overall Equipment Effectiveness (OEE) which should be 85 as per World Class Manufacturing. Equipment Effectiveness influences productivity, costs and quality. Higher values of equipment effectiveness indicate plant has minimized or eliminated wastages that arise from equipment related problem resulting in better productivity. This Book focuses on improving of OEE by addressing and solving of six major losses with proper methodology and corrective action methods. This book emphasizes on Problem Analysis with QC and Management Planning tools such as Root cause analysis, 5 Why analysis, Cause and Effect diagram, problem solving methodologies, Implementation of Maintenance systems, Standardized work and Low cost automation techniques. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
