

Mathematical Questions with Their Solutions, from the Educational Times Volume 1

Filesize: 1.96 MB

Reviews

An exceptional ebook and also the typeface applied was intriguing to read through. I have got read and i also am sure that i am going to likely to go through yet again once more in the foreseeable future. I discovered this pdf from my dad and i advised this ebook to find out.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1866 edition. Excerpt: . . . we have the equation of the conic of five pointic intersection at the point (ft). The result in its reduced form may be obtained directly without much difficulty, but it is obtained most easily as follows: let the function on the left-hand of the foregoing equation be represented by a, b, c, f, g, h ($r, j, ,$) then writing $x: y: z = 1: 8: 83$, we have $(a, b, c, f, g, h) (1, 8, S) 1958$. (Proposed by J. Gbippiths, M. A.)—Let P denote a point in the plane of a given triangle ABC ; $a, 0, 7$ the feet of the perpendiculars drawn from P upon the sides BC, CA, AB . Then if the triangle 07 is homologous with the given one ABC , the locus of P is a cubic which passes through (1) the angular points of the triangle; (2) the centres of the inscribed and escribed circles; (3) the point of intersection of the three perpendiculars; (4) the centre, O , of the circumscribing circle; (5) the points L, M, N , where the radii AO, BO, CO produced meet this circle again. Moreover, if V denote the inverse of P with respect to the sides of the given triangle, show that P also lies on the cubic-locus in question. I. Solution by J. Dale; and others. Let r, y, z be the coordinates of P , the equations of $Aa, B3, Oy$ will be $0 - \cos A \cos B$ and these...
