Metchnikoff believes to be the essential element in inflammatory, action. As we ascend higher in the scale of animal existence, it is interesting to note how the phagocytes become specialized and located in different parts of the economy. In invertebrate animals whose vascular system is not entirely shut off from the general bodycavity of the organisms, we do not find polynuclear leucocytes. In such (arthropodes and molluscs) inflammatory reaction may be induced and abundant leucocyte accumulation, accompanied by giant cell formation, take place, without any question of diapedesis, for the simple reason that the vascular system is not completely closed, and is in communication with the body cavity.
