Necessary Work: Discovering Old Forests, New Outlooks, and Community on the Andrews Forest Levno Al Figure 36 - Fred Swanson (left) takes initial readings from a set of erosion pins estab-lished in August 1980 at a study site on Mount St. Helens, shortly after the eruption earlier that year. and communication so the science, overall, could be better. Swanson and Franklin recruited Sedell into the collaborative effort at Mount St. Helens, and he emphasizes that the personal connection he had forged with Swanson over the previous decade 27 was the central reason for his decision to work with the group. The Mount St. Helens event was an opportunity to extrapolate themes originat-ing with the Coniferous Biome and test them against field conditions in the broader landscape of the Pacific Northwest. Among other benefits of their experience at Mount St. Helens, people in the group gained an appreciation for the power of...
