Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919 Excerpt: . . . PURPOSES OF INSTRUCTION Sibley College is organized, primarily, to teach the fundamental principles, theoretical and practical, that underlie the various branches of mechanical and electrical engineering. In addition to this there is included such work in pure and applied economics as is needed by the engineer of the present time. In the senior year students may take any one of the following options: A. Electrical Engineering. B. Heat-Power Engineering. Steam Engineering or Internal Combustion Engineering. C. Structural and Plant Engineering. D. Ship Design and Construction. E. Industrial Engineering. Since the work in any one of these options includes only a portion of the time of one academic year out of four, it follows that specialization cannot be carried very far; in fact the faculty of Sibley College holds the opinion that the duty of a technical school to its undergraduates is to train them thoroughly in fundamental subjects and that the four-year course is none too long for this purpose; hence the pressure to introduce narrow specialization early in the course has always been firmly resisted. It is well recognized that theoretical instruction must be supplemented by experience in practice and by contact with life before one can attain his greatest usefulness in the profession; hence, in Sibley College, an effort is made to bring the student into contact with teachers who are closely in touch with commercial engineering practice to the end that he may thus become familiar with problems encountered in modern engineering...
