## Quantum Chromodynamics and Beyond: Proceedings of the Gribov-80 Memorial Workshop

By Yu L. Dokshitzer

World Scientific Publishing Co Pte Ltd. Hardcover. Book Condition: New. Hardcover. 596 pages. Dimensions: 9.1in. x 6.1in. x 1.5in. Vladimir Naumovich Gribov was one of the most outstanding theoretical physicists, a key figure in the development of modern elementary particle physics. His insights into the physics of quantum anomalies and the origin of classical solutions (instantons), the notion of parton systems and their evolution in soft and hard hadron interactions, the first theory of neutrino oscillations and conceptual problems of quantization of non-Abelian fields uncovered by him, have left a lasting impact on the theoretical physics of the 21st century. Gribov-80 -- the fourth in a series of memorial workshops for V N Gribov -- was organized on the occasion of his 80th birthday in May 2010, at the Abdus Salam International Centre for Theoretical Physics. The workshop paid tribute to Gribovs great achievements and brought close colleagues, younger researchers and leading experts together to display the new angles of the Gribov heritage at the new energy frontier opened up by the Large Hadron Collider. The book is a collection of the presentations made at the workshop. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN....
